Message from the Company Director

It is my pleasure to introduce AGS Engineering & Construction Limited and to present this company profile to our clients, partners and stakeholders.

AGS Engineering & Construction Limited was established to provide practical, reliable and professional construction services across Papua New Guinea. Since incorporation, our focus has remained clear: deliver work that is safe, compliant, durable and completed with respect for the client, the site and the community we serve.

We understand that every project carries real responsibility. Whether the work involves civil construction, building, electrical installation, plumbing, air-conditioning, pest control, maintenance or project support, our team approaches each task with discipline, transparency and care.

Our commitment is simple: work honestly, communicate clearly, meet agreed standards and deliver value that clients can trust. We believe strong workmanship, ethical conduct and customer satisfaction are the foundation of long-term business success.

On behalf of AGS Engineering & Construction Limited, thank you for taking the time to learn more about our company.

Andrew G. Solomon

CEO / Company Director

AGS Engineering & Construction Limited

Company Overview

AGS Engineering & Construction Limited is a Papua New Guinean construction company based in Port Moresby, National Capital District. The company provides civil engineering, building construction and related technical services to government, education, health, commercial, industrial and private sector clients.

The company was originally incorporated on 27 October 2020 and re-registered under the Companies Act 1997 on 30 November 2023. AGS Engineering & Construction Limited is registered with IPA and operates as a locally owned company focused on reliable project delivery across Papua New Guinea.

Financial Capacity

The company maintains a business banking relationship with Bank South Pacific and is positioned to undertake approved construction and maintenance projects within its operational capacity.

Industry Experience and Capability

AGS Engineering & Construction Limited combines practical site experience, qualified tradespeople, project supervision and professional networks to deliver civil, building and technical works to required standards and specifications.

Mission, Vision and Values

Mission

To provide dependable, high-quality and cost-effective construction and engineering services that deliver measurable value for clients and support practical development in Papua New Guinea.

Vision

To be recognised as a trusted Papua New Guinean construction company known for integrity, workmanship, safety and reliable delivery.

Values That Drive Us

- Open communication at every level of engagement.
- Dedication to quality, safety and timely delivery.
- Professional service that meets agreed requirements.
- Innovation and practical problem-solving that add value to each project.
- Respect for people, communities and the environment.
- Ethical conduct, transparency and accountability.

Core Services

Service Area	Scope of Work
Civil Engineering	Roads, drainage, culverts, pavements, footpaths, concrete works, surveys and related civil works.
Building Construction	Residential, commercial, institutional and industrial construction, renovation and maintenance.
Electrical Works	Electrical installation, testing, commissioning, lighting, switchgear, panels, maintenance and power systems support.
Plumbing	Plumbing installation, maintenance, water reticulation and sewerage-related works.
Air Conditioning	Installation, servicing and maintenance of air-conditioning systems.
Pest Control	General pest inspection, treatment and control services for project and facility requirements.
Project Management	Planning, documentation, scheduling, procurement, supervision, quality control and handover support.

Civil, Building and Technical Services

Civil Engineering

- Reconstruction and maintenance of sealed and unsealed roads.
- Construction of line drains, culverts, wing walls, aprons and gully pits.
- Pothole patching, pavement works, concrete works and footings for structures.
- Road and pavement works, bridging systems, drainage systems, water reticulation and sewer reticulation.
- Cadastral and topographic survey support where required.

Building Construction

- Building design support, estimation and construction.
- Residential, commercial, industrial, school, church, hospital and institutional building works.
- Demolition, disposal of building structures and scaffold erection.
- Renovation, maintenance, carpentry, painting, tiling, plastering and concrete works.

Electrical

- Electrical installation, testing and commissioning.
- Preventive maintenance of transformers, switchgears and electrical equipment.
- Lighting for residential, commercial and industrial applications.
- Low, medium and high-voltage switchgears, transformers and capacitor banks.
- Control units, distribution panels, transfer switches, cable trays and grounding systems.

Plumbing, Air Conditioning and Pest Control

The company also supports plumbing, air-conditioning installation and servicing, and pest control services as part of integrated building and facility support capability.

Project Management Approach

AGS Engineering & Construction Limited applies a practical project management approach built around clear scope definition, realistic planning, site coordination, cost awareness, quality control and accountable handover. The company works across every project as a complete delivery cycle, from early planning through procurement, construction, commissioning and closure.

Project Phase	Delivery Focus
Conceptual Study	Understand the client need, project purpose, constraints and available options.
Feasibility and Planning	Review options, define deliverables, assess risks and prepare practical project requirements.
Execution	Mobilise resources, coordinate work activities, manage safety and quality and control progress.
Commissioning and Handover	Complete inspections, close outstanding items and hand over the finished works.
Post-Project Review	Review performance, lessons learned and opportunities for improvement.

Management and Workforce

AGS Engineering & Construction Limited operates through a capable management and site delivery structure that supports planning, administration, finance, technical coordination and project supervision.

Function	Role
General Manager	Overall company leadership, client coordination and project oversight.
Operations	Planning, mobilisation, site coordination and delivery supervision.
Administration, IT and HR	Office administration, records, people coordination and support systems.
Finance	Project costing, payments, reporting and financial administration.
Civil / Building / Electrical / Project Management Team	Technical coordination and delivery across major service areas.
12 Supervisors / Foremen	Site supervision, task direction, safety monitoring and quality control.
General Labour Team	Approximately 200 general labourers available, including full-time and part-time capacity.

Management and Supervisory Capability

The company is supported by team leaders with experience in building supervision, boilermaking, maintenance, project engineering, inspection and asset integrity. This experience strengthens site coordination, technical supervision and quality delivery.

Tradesmen and Trade Assistants

The workforce includes experienced tradespeople and trade assistants across plumbing, carpentry, electrical, finishing, steel fixing, scaffolding, earthworks, planning and levelling. The company also has access to boilermakers, doggers, pipe fitters and electrical and instrumentation technicians.

Professional Network

AGS Engineering & Construction Limited maintains professional relationships with architectural, civil, structural, electrical, instrumentation, mechanical and geotechnical engineering firms to support broader project requirements when required.

Environment, Health and Safety

Environment, health and safety are priority areas for AGS Engineering & Construction Limited. The company aims to plan and conduct work in a manner that protects workers, visitors, surrounding communities, property and the environment.

For each project, the company considers the scope of work, site risks, relevant safety requirements and practical controls needed to manage the work safely. Safety planning, instruction and site supervision form part of the company's work approach.

Safety Management Commitments

- Assess risks and plan work activities to eliminate or control foreseeable hazards.
- Comply with relevant occupational health and safety, workplace injury management and workers compensation requirements.
- Consult employees and subcontractors and communicate relevant safety information.
- Maintain workplaces, plant and equipment in safe working condition.
- Provide appropriate instruction, supervision and training.
- Allocate practical resources to achieve safe work outcomes.

Quality Management

AGS Engineering & Construction Limited places high value on workmanship, inspection and documentation. The company's objective is to deliver work that meets agreed standards, client expectations and practical project requirements.

The company uses quality control methods including project-specific checklists, inspection and test planning, inspection reports and close-out documentation. This supports accountability throughout the project lifecycle and gives clients confidence that agreed standards are being followed.

Insurance and Compliance

AGS Engineering & Construction Limited maintains corporate registration and insurance records relevant to its business operations in Papua New Guinea. The company also holds insurance cover for public liability and workers compensation as recorded in its certificate documentation.

Record	Details
IPA Registration	Registration Number: 1-128615
IPA Status	Registered
Date of Last Annual Return	18 February 2026
IRC Certificate of Compliance	Certificate No. 11140374
IRC Taxpayer Identification Number	501765392
Public Liability Insurance	Policy No. PL-20250516991; period of cover 28/05/2025 to 28/05/2026
Workers Compensation Insurance	Policy No. WC-20250516993; period of cover 28/05/2025 to 28/05/2026

Principles and Management Contribution

- **Honesty:** truthful, reliable and open conduct in daily operations.
- **Integrity:** ethical and professional standards in every business activity.
- **Transparency:** accountability, proper delivery and clear service.
- **People focus:** recognising the company's success depends on skilled, motivated and fairly treated people.
- **Courage and determination:** overcoming project challenges and achieving business goals through capable human resources.

Management Contribution

Management remains committed to building a capable, disciplined and service-focused organisation. The company continues to strengthen its workforce, improve internal coordination, meet social and legal responsibilities, and provide services that support client needs while maintaining practical commercial competitiveness.

Executive Summary

AGS Engineering & Construction Limited is a nationally owned Papua New Guinean construction company with practical experience across civil engineering, building construction, electrical works, plumbing, air-conditioning, pest control, maintenance and project management.

The company takes responsibility for safe, quality-driven project delivery. Its management, supervisors, tradespeople and support personnel work together to plan, coordinate and complete projects in a professional manner.

Through its project record, technical capability, compliance documents and commitment to client satisfaction, AGS Engineering & Construction Limited is positioned to support public sector, institutional, commercial and private sector clients across Papua New Guinea.

Declaration

I declare that the information contained in this company profile is true and correct to the best of my knowledge and is provided for client, partner and procurement consideration.
